MediaWise-OPS: Order Process & Follow-Up System

Main Characteristics

- Electronic follow-up of orders and all their individual stages they consist of
- Simultaneous use by many users from different company departments
- Easy and effective supervision of the total order process
- Print out of all kinds of order forms and reports, such as notes to suppliers and transporters, sticker-labels with delivery details for carton boxes and envelopes, notes for internal use by the company's financial department and counting house
- Several programmable alarms for mis-processed orders, delays, etc.
- Flashback to already processed and fulfilled orders for further examination of their individual stages and characteristics
- Easy data recall from history file(s)
- Customers may access their order's data via Internet, and monitor the process of the order, without calling the company (optional)

Induced Benefits

- Frees-up human resources, since one single person may easily trace and control multiple orders
- Improves the reliability of production proceedings
- Improves the timing and punctuality of order process and fulfillment
- Improves the company's prestige
- Managers may easily supervise order fulfillment and related proceedings, without the need of any time-consuming briefing by operations employees
- Order process is stored to history file(s) for future reference
- Easy localization to any desired language
